Dear Parent/Guardian,

December 12, 2011

Mount Prospect Elementary School is currently participating in the Grow Healthy NJ School Wellness Project, which is a fun, educational program designed to promote healthier eating, more physical activity, and an overall healthy school environment.

A component of this project involves finding ways for schools and parents to better work together on school wellness issues.

We invite you to participate in the attached survey which will allow you to provide your input on issues important to your family's health such as healthy eating, being physically active, your school wellness policies/programs, and other topics related to child, family, and school wellness.

We thank you in advance for taking the time to complete this survey! The survey will take approximately 10 minutes to complete. Please note that parents need fill out the survey only once per family, even if more than one child attends our school.

To participate in the survey, click on the following link, read the consent for participation and click **Next** at the bottom of the page.
